

CureZero (Pharmacy Store)

CureZero is an internet-based platform devoted to pharmaceutical care that provides a single destination for users. We believe in the concept of "Your health, our care", and our pricing keep your heart healthy as well. We strive to create an environment where health and happiness coexist.

User Guide:

Home Page:

This is the landing page of our website. It prompts users to select whether they are admin, an employee or a customer.

Admin:

If the user chooses the admin option, he is taken to the admin login page where he inputs his credentials (username and password). He is then sent to the dashboard from which he has the authority to do a variety of actions like:

1. Dashboard: viewing the dashboard (total sales, in-stock medicines, out-of-stock medicines)
2. Medicines: accessing, adding, updating and deleting medications from the list
3. Employees: browsing, adding, updating and deleting the employee list
4. Suppliers: viewing, adding, updating and deleting suppliers from the list
5. Customers: viewing the customers
6. Transactions: viewing and adding the transactions

Employee:

If the user chooses this option, he is taken to the employee login page where he inputs his credentials (username and password). He is then sent to the dashboard from where he has the authority to carry out actions. However, because the user is now an employee, he is restricted to only a few features like:

1. Dashboard: viewing the dashboard (total sales, in-stock medicines, out-of-stock medicines)
2. Medicines: merely examining the list of medications
3. Suppliers: viewing, adding, updating and deleting suppliers from the list
4. Customers: merely viewing the customers
5. Transactions: displaying the completed transactions

Customer:

If the user chooses the customer option, he is taken to the customer login page where he inputs his credentials (username and password). If the customer is new, he must first register before proceeding. He has basic customer rights like:

1. Medicines: viewing the medication list
2. Order: placing an order
